Task:- Online Job Portal

Main.java :-

```java
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {
        JobPortal jobPortal = new JobPortal();
        Scanner scanner = new Scanner(System.in);
        int choice;

        do {
            System.out.println("\n=== Online Job Portal ===");
            System.out.println("1. Register as Employer");
            System.out.println("2. Register as Job Seeker");
            System.out.println("3. Post a Job (Employer)");
            System.out.println("4. Search Jobs (Job Seeker)");
            System.out.println("5. Exit");
            System.out.print("Enter your choice: ");
            choice = scanner.nextInt();

            switch (choice) {
                case 1:
                    jobPortal.registerEmployer();
                    break;
                case 2:
```

```java
                jobPortal.registerJobSeeker();
                break;
            case 3:
                jobPortal.postJob();
                break;
            case 4:
                jobPortal.searchJobs();
                break;
            case 5:
                System.out.println("Exiting...");
                break;
            default:
                System.out.println("Invalid choice. Try again.");
        }
    } while (choice != 5);

    scanner.close();
    }
}
```
